Why Choose A Peerless® Pinnacle® Gas or Oil-fired Boiler?

We are committed to providing you with the best built heating products available.

Healthy Heating – Keep your family warm, healthy and happy with hydronic heating - the most practical, dependable and efficient method available for heating a home. Hydronic (hot water) systems heat by convection without the need for fans or blowers. This method of heat transfer is gentler and cleaner than that of furnaces and heat pumps, which circulate dust and allergens through the air.

Comprehensive Warranty – You'll have both security and peace of mind with our complete warranty program for residential boilers (visit PeerlessBoilers.com for detailed warranty information). You can relax knowing your new Peerless boiler will provide years of dependable home heating comfort.

Pinnacle Oil

Quiet Operation/Clean Burning

– Peerless® Pinnacle® gas and oil-fired boilers are quiet in operation - as quiet as most home appliances! They are also very clean burning, helping to keep our environment free of pollutants. The Peerless Pinnacle gas-fired boiler is available for both natural and LP gas.

Peerless® Pinnacle® Gas
Wall-hung

Low Profile Design –

The compact design of Peerless Pinnacle gas boilers makes them ideal for installations where space is limited. Two "wall mounted" models are available in the Pinnacle gas boiler line to further conserve floor space. The Peerless Pinnacle oil boiler also offers a slim design and small footprint.

ENERGY STAR® Efficient Products –

Peerless Boilers is proud to be an ENERGY STAR® partner! In cooperation with the U.S. Environmental Protection Agency and the Department of Energy, Peerless Pinnacle gas and oil boilers have earned

the ENERGY STAR symbol used to identify high-efficiency products*.

Boilers with AFUE (average fuel utilization efficiency) ratings of 85% or higher qualify for the ENERGY STAR

label. Installing an ENERGY STAR qualified boiler is not only efficient and economical, but also environmentally friendly. With efficiency ratings as high as 95.1%, you can expect savings on your fuel bills by choosing a Peerless Pinnacle boiler.

Radiant Heating – Radiant heating systems heat by circulating hot water (hydronic heat) through special piping installed in and under floors, in walls and in ceilings. Using a Peerless Pinnacle gas or oil-fired boiler as the main source to produce heat for your radiant system will provide your family with consistent, even heating and the ultimate in home comfort!

**Residential Models*

Domestic Hot Water – For truly efficient hot water heating, we offer the Peerless® Partner® indirect-fired water heater that supplies up to five times the amount of hot water as comparably sized electric water heaters. Utilizing a Peerless gas or oil boiler as its heat source, the Partner gently transfers heat energy from the boiler to the water heater through a highly efficient, fin-tube heat exchanger. The Peerless Partner is virtually maintenance free and has a rapid recovery rate - over two times more than that of gas-fired water heaters - making it a sensible and efficient addition to your home heating system.

Peerless® Partner®

Choose Your Heating Professional Carefully.

Selecting a reputable heating contractor is the first step to ensure a reliable home heating system. Ask your local heating professional how Peerless Boilers can provide your family with

DEPENDABLE HOME HEATING COMFORT!
