

PEERLESS® STEAM TRAINING CLASS

Join Gerry Hogan - Director of Product Training at PB Heat - for a day committed to discussing hydronic steam boilers. The full day class will be broken into 3 parts, covering the most frequently asked questions regarding steam boilers. Topics include:

COLOR OF STEAM

- 15 Basic Rules of Steam Systems
- Appropriate sizing for loads and BTUs
- Proper piping and wiring of boilers and accessories

COLOR OF WATER 2.0

- Accurate calculations for load sizing and water pressure
- All appropriate fixtures and valves for correct placement and usage
- Discussion of return on investment for indirect water heaters

GM™ & FLEX-HEAT®

- Differences Between Modular vs Multiple Boilers per Code
- Sizing a Bank of Boilers for Capacity & Mechanical Room Space
- Replacing an Older Modular Boiler System
- Sizing for gas pipes, vents, and manifolds
- Wiring and Controls – tekmar multiple boiler controls

AUG 15 - Twin Cities, MN

COST: \$145

(Includes light breakfast & lunch)

INSTRUCTORS:

Gerry Hogan

Gerry Hogan has been Director of Product Training at PB Heat, LLC for 17 years. He designs and leads various technical training classes on a variety of subjects, including combustion, venting, hydronic and steam piping, wiring and controls. Gerry designed and built a training laboratory with six live-fire boilers of up to 1mm BTUH capacity and built two mobile training classrooms on trailers that have up to six live-fire boilers.
